QUALITY PERFORMS.

Solutions for versatile applications

Additives for polyvinyl chloride

ADDITIVES FOR POLYVINYL CHLORIDE

Additives	Chemical description	Coating Metal coating					ng	
		Textile	Artificial	Wall	Flooring	Coil	Auto-	Capsules
Plasticizers			leather	covering		coating	motive	
Mosamoll®	Alladeulfonic phonyl octor							
Mesamoll® II	Alkylsulfonic phenyl ester				- 21	- 2.1	- 2-	
Mesamoll [®] 51067	Blond of alkylsulfonic phonyl ostor	-	-	-	-	-		-
	Di-(2-ethylberyl) adinate						_	
	Di-(2-citiyincxyi) adipate							-
	Benzyl (2-ethylbeyyl) adniate							
K-ELEX® 850P	Dibenzoate blend				- 21	- 21	- 21	
K ELEX® DD		-	-	-	-	-	-	
K-FLEX® 975P	Dibenzoate blend							
	Pland of glycorol acotato				- 2-	-	-	
Triacotin®	Glycorol triacotato		-	-	-			-
Acotino [®] 51025								
Acetine J1035	Polyadinata	-						-
	Polyadipate	-					- 2-	
	Polyadipate							
	Polyadipate	-	-	-				-
	Polyadipate	-						
	Polyadipate							
	Polyadipate	-	-					-
Baymod [®] PO	Polyester uretnane							
Bonding agents								
Bonding agent 2005	Polyisocyanurate in n-butyl acetate							
Bonding agent 3001	Polyisocyanurate in benzyloctyl adipate							
Bonding agent 51066	Polyisocyanurate in Mesamoll® II							
Bonding agent 51030	Polyisocyanurate in DINP							
Potlife enhancer II	Organic acid chloride in Mesamoll® II							
Antistatic agents								
Mersolat [®] H types	Sodium alkane sulfonates							
Flame retardants – phosp	horus-based							
Disflamoll [®] DPK	Cresyl diphenyl phosphate							
Disflamoll [®] TKP	Tricresyl phosphate							
Disflamoll [®] DPO	2-Ethylhexyl diphenyl phosphate							
Disflamoll [®] TOF	Tris (2-ethylhexyl) phosphate							
Disflamoll [®] 51036	Phosphate ester blend							
Disflamoll [®] 51092	Butylated triphenyl phosphate							
Reofos® 35	Isopropylated triphenyl phosphate							
Reofos® 50	Isopropylated triphenyl phosphate							
Reofos® 65	Isopropylated triphenyl phosphate							
Reofos® 95	Isopropylated triphenyl phosphate							
Reofos [®] 1800	Blend of triaryl phosphates							

Vinyl sealants Food Characteristics Extrusion Calendering Dipping Rotational molding co Hollow Films, cables, Sheets Gloves pipes & profiles articles

 General purpose Lower volatility than Mesamoll[®] Higher gelation speed than Mesamoll[®] Low-temperature flexibility, high UV-stability Secondary plasticizer, very low viscosity and high migration Low-temperature flexibility, high UV-stability High gelation speed, stain and extraction resistance High solvator and versatile, liquid below 0 °C, best in organosols High gelation speed, excellent stain and extraction resistance Sensitive applications Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration, fast gelation Low migration, fast gelation Low migration, fast gelation Low migration, fast gelation Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potifie of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance, low odor Low viscosity Excellent flame retardance, low odor Low viscosity Excellent flame retardance Very low geling temperature Excellent flame retardance Kery low density in PVC compounds Excellent flame retardance Fixellent flame ret	ntact*	
 General purpose Lower volatility than Mesamoll[®] Higher gelation speed than Mesamoll[®] Low-temperature flexibility, high UV-stability Secondary plasticizer, very low viscosity and high migration Low-temperature flexibility, high UV-stability High gelation speed, stain and extraction resistance High gelation speed, excellent stain and extraction resistance Sensitive applications Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration Low migration Low migration, fast gelation High extraction and migration resistance High extraction and migration resistance Low migration Low migration Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potifie of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance, low odor Low since density in PVC compounds Excellent flame retardance, low odor Low since density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance Kery low geling temperature Excellent flame retardance Kery low density in PVC compounds Excellent flame retardance Kery low density in PVC compounds Excellent flame retardance Kery low density in PVC compounds Excellent flame retardance Kery low density in PVC compounds Exc		
 General purpose Lower volatility than Mesamoll® Higher gelation speed than Mesamoll® Low-temperature flexibility, high UV-stability Secondary plasticizer, very low viscosity and high migration Low-temperature flexibility, high UV-stability High gelation speed, stain and extraction resistance High solvator and versatile, liquid below 0 °C, best in organosols High gelation speed, excellent stain and extraction resistance Sensitive applications Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration and migration resistance High extraction and migration resistance Low migration, fast gelation High extraction and migration resistance Low migration Low migration Low migration Low migration Low migration Plasticizing polymer Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance, low odor Low viscosity Excellent flame retardance Very low sicosity Excellent flame retardance Very low sicosity Excellent flame retardance Very low viscosity Excellent flame retardance Secolation and retardance Very low sicosity Excellent flame retardance Excellent flame retardance Very low viscosity Excellent flame retardance Fixellent fla		
Lower volatility than Mesamoll® Low-temperature flexibility, high UV-stability Secondary plasticizer, very low viscosity and high migration Low-temperature flexibility, high UV-stability High gelation speed, stain and extraction resistance High solvator and versatile, liquid below 0 °C, best in organosols High gelation speed, excellent stain and extraction resistance Sensitive applications Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration Low migration resistance High extraction and migration resistance Low migration, fast gelation High extraction and migration resistance Low migration Low migration Low migration Low migration Low migration Low migration High extraction and migration resistance Low migration Low migrat		General purpose
 Low temperature flexibility, high UV-stability Secondary plasticizer, very low viscosity and high migration Low-temperature flexibility, high UV-stability High gelation speed, stain and extraction resistance High solvator and versatile, liquid below 0 °C, best in organosols High gelation speed, excellent stain and extraction resistance Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration Low migration fast gelation High extraction and migration resistance High extraction and migration resistance Low migration, fast gelation High extraction and migration resistance Low migration Low migration Low migration Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier, high performance Non-phthalate carrier, high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Non-phthalate carrier performance Non-phthalate carrier Phthalate-based carrier, high performance Non-phthalate c	-	Lower volatility than Mesamoll®
 Low-temperature flexibility, high UV-stability Secondary plasticizer, very low viscosity and high migration Low-temperature flexibility, high UV-stability High gelation speed, stain and extraction resistance High solvator and versatile, liquid below 0 °C, best in organosols High gelation speed, excellent stain and extraction resistance Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration Low migration fast gelation High extraction and migration resistance High extraction and migration resistance Low migration Low migration Low migration Low migration Low migration Low migration Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Non-phthalate carrier Phthalate carrier Phthalate-based carrier, high performance Non-phthalate carrier Phthalate-based carrier, hi		Higher gelation speed than Mesamoll®
 Secondary plasticizer, very low viscosity and high migration Low-temperature flexibility, high UV-stability High gelation speed, stain and extraction resistance High pelation speed, excellent stain and extraction resistance Sensitive applications Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration and migration resistance High extraction and migration resistance High extraction and migration resistance High extraction and migration resistance Low migration Low migration, fast gelation High extraction and migration resistance Low migration Down-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier, high performance Non-phthalate carrier, high performance Improves potilie of bonding agent containing paste 	-	Low-temperature flexibility, high UV-stability
Low-temperature flexibility, high UV-stability High gelation speed, stain and extraction resistance High solvator and versatile, liquid below 0 °C, best in organosols High gelation speed, excellent stain and extraction resistance Sensitive applications Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration High extraction and migration resistance High extraction and migration resistance High extraction and migration resistance Low migration Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance, low odor Low viscosity Excellent flame retardance	_	Secondary plasticizer, very low viscosity and high migration
 High gelation speed, stain and extraction resistance High gelation speed, excellent stain and extraction resistance Sensitive applications Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration and migration resistance High extraction and migration resistance Low migration Low migration Low migration Low migration fast gelation Low migration Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potifie of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance Keylent flame retardance		I ow-temperature flexibility, high UV-stability
 High solvator and versatile, liquid below 0 °C, best in organosols High gelation speed, excellent stain and extraction resistance Sensitive applications Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration, fast gelation High extraction and migration resistance High extraction and migration resistance Low migration Low migration Low migration Low migration High extraction and migration resistance Low migration Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Inproves potife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance Very low selling temperature Excellent flame retardance Keylent flame retardance, low odor Low viscosity Excellent flame retardance Fixeellent flame retardance Keylent flame retardance Fixeellent flame retardance Fixeellent flame retardance Keylent flame retardance Keylent flame retardance Fixeellent flame retardance Fixeelle		High gelation speed, stain and extraction resistance
High gelation speed, excellent stain and extraction resistance Sensitive applications Secondary plasticizer Low migration High extraction and migration resistance High extraction and migration resistance Low migration Low migration and migration resistance High extraction and migration resistance Low migration Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier Phthalate carrier Phthalate carrier Phthalate carrier Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance		High solvator and versatile, liquid below 0 °C, best in organosols
 Sensitive applications Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration and migration resistance High extraction and migration resistance Low migration, fast gelation Low migration, fast gelation Low migration and migration resistance Low migration Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Keylent flame retardance Keylent flame retardance Keylent flame retardance Excellent flame retardance Keylent flame		High gelation speed, excellent stain and extraction resistance
 Secondary plasticizer, improving gelling speed Secondary plasticizer Low migration Low migration, fast gelation High extraction and migration resistance High extraction and migration resistance Low migration, fast gelation Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Keylent flame retardance K		Sensitive applications
Secondary plasticizer Low migration Low migration, fast gelation High extraction and migration resistance High extraction and migration resistance Low migration, fast gelation Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate carrier Phthalate carrier Phthalate carrier Phthalate carrier Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retarda		Secondary plasticizer, improving gelling speed
 Low migration Low migration, fast gelation High extraction and migration resistance High extraction and migration resistance Low migration, fast gelation Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Keylent flame retardance Keylent flame retardance, low odor Low viscosity Excellent flame retardance Keylent flame retardance Excellent flame retardance Keylent flame retardance Excellent flame retardance Excellent flame retardance Keylent flame retardance<		Secondary plasticizer
 Low migration, fast gelation High extraction and migration resistance High extraction and migration resistance Low migration, fast gelation Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potifie of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance Keylent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance Keylent flame retardance Excellent flame retardance Excellent flame retardance Keylent		Low migration
 High extraction and migration resistance High extraction and migration resistance Low migration, fast gelation Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance Kerellent flame retardance Kerellent flame retardance, low odor Low viscosity Excellent flame retardance Kerellent flame		Low migration, fast gelation
 High extraction and migration resistance Low migration, fast gelation Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance 		High extraction and migration resistance
 Low migration, fast gelation Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance 		High extraction and migration resistance
 Low migration Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance 		Low migration, fast gelation
 Plasticizing polymer Non-phthalate carrier, very high performance Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance 		Low migration
Non-phthalate carrier, very high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low smoke density in PVC compounds Excellent flame retardance, low odor Low viscosity Excellent flame retardance, low odor		Plasticizing polymer
Non-phthalate carrier, very high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent flame retardance, low odor Low smoke density in PVC compounds Excellent flame retardance flame Excellent flame retardance flame Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance		
Non-phthalate carrier, high performance Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance		Non-ohthalate carrier very high performance
Non-phthalate carrier Non-phthalate carrier Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Fxcellent flame retardance		Non-phthalate carrier, very high performance
Phthalate-based carrier, high performance Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance		Non-phthalate carrier
Improves potlife of bonding agent containing paste Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance		Phthalate-based carrier high performance
Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance		Improves potlife of bonding agent containing paste
Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance Excellent flame retardance		improves pourie of boriding agent containing paste
Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance Excellent flame retardance		
Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance		Various conc.: H 30, H 40, H 68 and H 95, emulsifier for E-PVC
 Excellent flame retardance Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance 		
Very low gelling temperature Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance		Excellent flame retardance
 Low smoke density in PVC compounds Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance 		Very low gelling temperature
Excellent low-temperature flexibility Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance		Low smoke density in PVC compounds
Designed for artificial leather Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance		Excellent low-temperature flexibility
Excellent flame retardance, low odor Low viscosity Excellent flame retardance Excellent flame retardance		Designed for artificial leather
Low viscosity Excellent flame retardance Excellent flame retardance		Excellent flame retardance, low odor
Excellent flame retardance Excellent flame retardance		Low viscosity
Excellent flame retardance		Excellent flame retardance
		Excellent flame retardance
Low volatility		Low volatility
Low volatility		Low volatility
